Subject: Objection to Federal Redistribution

We strongly disagree of the boundary change for Flagstaff Hill, Aberfoyle Park and Happy Valley from Boothby to Kingston. We have always been and identify with the Federal Boothby electorate since we moved to this area in 1988. We have lived in Flagstaff Hill for 30 years and our community identifies and recognizes more with the Adelaide Plains and Mitcham Hills areas which encompass of the areas of Marion and Blackwood.

The years that we have lived here our suburbs have been classed as a central suburb and we are on the border of the southern suburbs. By changing the boarders this will be detrimental to the housing market here being on the boarder and classed as a central suburb. This move will devalue our properties.

We are not the far Southern Suburbs.

As a community minded person we have always been involved with community groups in these areas and not the far southern suburbs. We have watched and seen our suburb and areas grow and develop over the years, with the great support of Federal members and also the Federal Boothby seat being a strong Liberal seat, we feel this would be a great injustice to the area.

We have been strong supporters and users of the Flagstaff Hill Sports and Community Centre over the years which our members have been able to secure funding for new projects. Living in Flagstaff Hill in the last 30 years we have seen the infrastructure in the area grow and expand with the initial upgrade of Flagstaff Hill Road, the Happy Valley Road installation, the expansion of the Flagstaff Hill Sports and Community Centre, the expansion and upgrades to the Finders Medical Centre and Flinders University, now the South Road-Sturt Road Darlington Upgrades and many more projects have been strongly supported by our Federal members.

We are happy to be are part of the Boothby electorate and do not wish to have our boundaries moved!! This will devalue out property.

WE STRONGLY OBJECT AND WE ARE NOT A SOUTHERN SUBURB!!

Kind regards

David & Deborah Gillard
