South Australian Redistribution suggestion uploaded from the AEC website.

Name: Darren McSweeney

Organisation:

Address: [REDACTED]

Phone number: [REDACTED]

Additional information: Please find attached submission for the SA Redistribution SA.zip. Contained within are three files, the SA Redistribution Report in pdf, SA Divisions Excel spreadsheet and an identical copy of the spreadsheet in pdf.

## Introduction

Now finally, it's South Australia's turn, coming some 12 months ahead of schedule. This will be the first South Australian redistribution using the Australian Statistical Geography Standard, introduced in 2011, converting all states and territories into the new standard. The redistribution was necessitated by the reduction in population, and therefore a reduction in the entitlement from 11 seats down to only 10. This reduction had been forecast for some time, with population figures showing a steady decline within the state.

This is more than just a simple case of removing a division, as any changes will result in upheaval to the neighbouring divisions, and by extension, flow to almost all other divisions within the state.

## Division Names

With the loss of one division, the only changes to the names that I see as necessary is the removal of the abolished division. My proposal strengthens division names in South Australia by simply eliminating division with the least desirable name, being **Port Adelaide**. All other names within South Australia are strong, recognisable names and should be retained. In the future, having divisions honouring the Hon Julia Eileen Gillard AC – the first female Prime Minister of Australia – and the Rt Hon Sir Frederick Holder KCMG – the very first Speaker of the House of Representatives and Premier of South Australia – would be desirable at some point, but these are not feasible options at the moment. There are not very strong reasons for changing the name of any existing division.

## Methodology

Most calculations I refer to will use the projected enrolment data, as this is the stricter criterion. In order to obtain the best communities of interest, I intend to make use of the full tolerance of the quota and several divisions will appear close to the limits, however I believe the full tolerance limits exist to be used to their maximum extent to achieve better representation for residents.

I attempt to use clear boundaries where possible, and prefer to use geographic features, such as roads, rivers or railways, and will freely split SA1 divisions where a geographic feature makes more sense. I will prefer to keep local government areas intact in regional areas, however this may not always be a viable, or even valid, solution. In cases where split SA1 data is

not available, I make a judgement call as to which division I include the enrolled residents. More accurate information should be available for the Committee to ensure all divisions fully comply to numerical constraints.

Finally, I determine electoral division boundaries in a completely impartial manner, disregarding potential political implications for divisions. I do not attempt to even make myself aware of voting patterns in areas to avoid influencing my decisions. Political support should not be considered a community of interest.

## Existing Divisions

Like many other states, South Australia has lower growth, and lower enrolment in the regional and rural areas, while metropolitan areas see some steady growth, particularly in outer regions. The current divisions vary from 102,009 electors in remote and rural Grey to 115,227 in Port Adelaide. All these divisions are far below the projected quota of 122,731.

A distinct boundary is formed east of Adelaide, with the Adelaide Hills range creating a barrier to communities in the east. The addition of metropolitan local government boundaries in this area creates a boundary that should not be crossed without good reasons. Apart from that divide, there are few natural barriers in the state, and the obvious feature of the Murray River actually unites communities rather than dividing them and is not used as a boundary for any significant length.

All divisions need to gain electors mostly as result of the reduced division. Obviously electors in the abolished division will need to be redistributed to other divisions, which in turn can spread to their neighbouring divisions.

## Proposed Divisions

I commence the redistribution in the rural and regional areas of the state. In South Australia, there are only two truly rural divisions, Grey and Barker. The current configurations of Wakefield and Mayo include significant areas of urban or semi-urban development.

**Grey**, occupying over 92 percent of the state, is considerably under the current threshold, and as it borders only Barker and Wakefield, must gain electors from at least one of these divisions. As the boundary with Barker is quite distinct, following local government boundaries for the most part, and being that Barker is also well under threshold, it makes sense to make up the shortfall of electors from Wakefield alone. Grey therefore gains the rest of Wakefield Regional Council, and all of the District Council of Clare and Gilbert Valleys and Adelaide Plains Council (formerly Mallala).

This brings Wakefield much more into metropolitan Adelaide, so it then sheds most of Light Regional Council (except a few SA1s around Gawler) and all of its portion of Barossa Council into **Barker**, which also takes in the portions of Barossa Council in Mayo. This brings Barker into tolerance and no further changes are needed for Barker.

**Wakefield** is now under quota, so expands further into Adelaide, taking in parts of Salisbury and Paralowie, the new boundary running along Main North Road and Kings Rd as far as the Little Para River, which it then follows to the coast. The areas in the City of Salisbury south of this line, formerly part of the now abolished **Port Adelaide**, are transferred into **Makin**, which also takes the small area of Dry Creek bordered by the railway line, Grand Junction Rd and Port Wakefield Rd.

The former Port Adelaide is then split, with the areas on the peninsula including Semaphore, Largs Bay and Outer Harbor, as well as all areas south of Port Rd moved into **Hindmarsh** which then loses all of the City of Marion and City of Holdfast Bay. I was unsure whether to use the City of West Torrens boundary or the Sturt River as a boundary in this area, but decided to opt for the river in the end, however, the area of Glenelg North across the river is also transferred, keeping Glenelg intact.

The remaining areas of the former Port Adelaide north of Port Rd are then transferred into **Adelaide**, which in turn sheds all of its share of the City of Norwood Payneham & St Peters and the City of Burnside to **Sturt** which needs no further changes. As Adelaide is still just over tolerance at this point a part of Unley, between the Belair railway line and the tram line along Norman and Aloha Terraces is transferred out of Adelaide into Boothby.

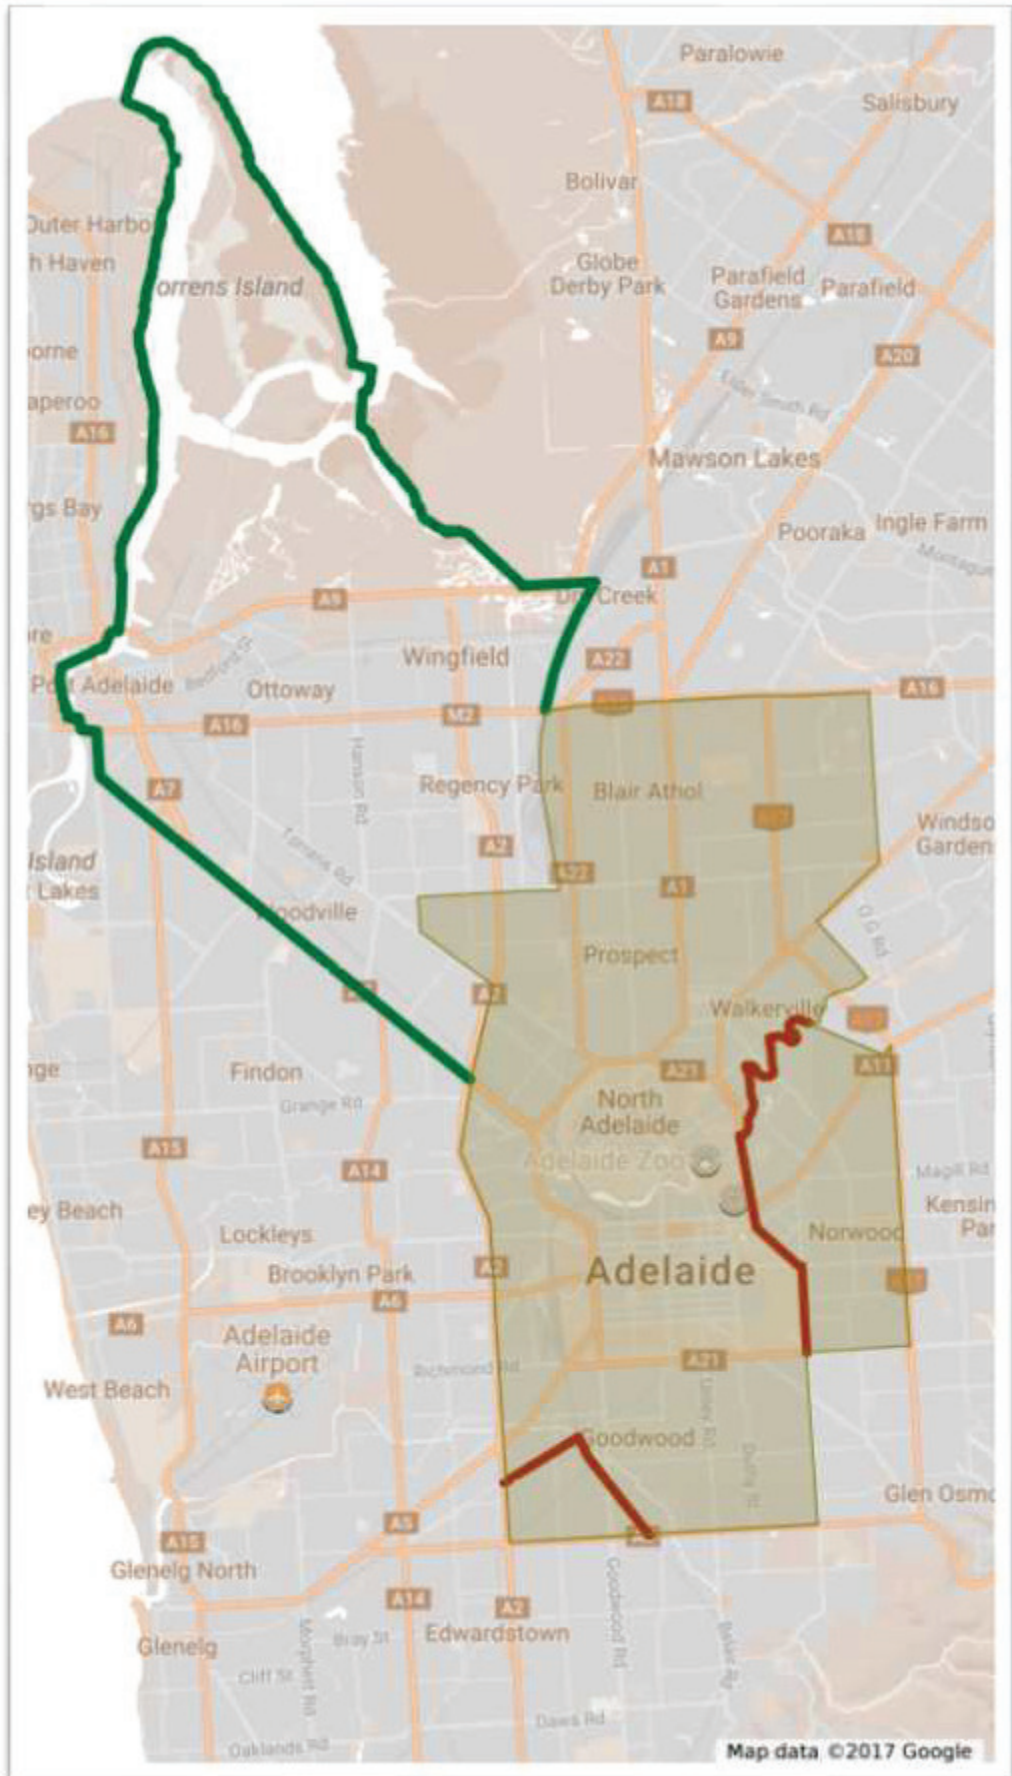

Having gained the area in Unley from Adelaide, and the City of Marion and Holdfast Bay from Hindmarsh, **Boothby** now can transfer all of the southern part to Kingston. All of Boothby's portion of the City of Onkaparinga, and everything in the City of Marion south of Seacombe Road is transferred. This brings Boothby into tolerance, and provides a more compact shape, focussing on Holdfast Bay, the northern part of Marion and Mitcham.

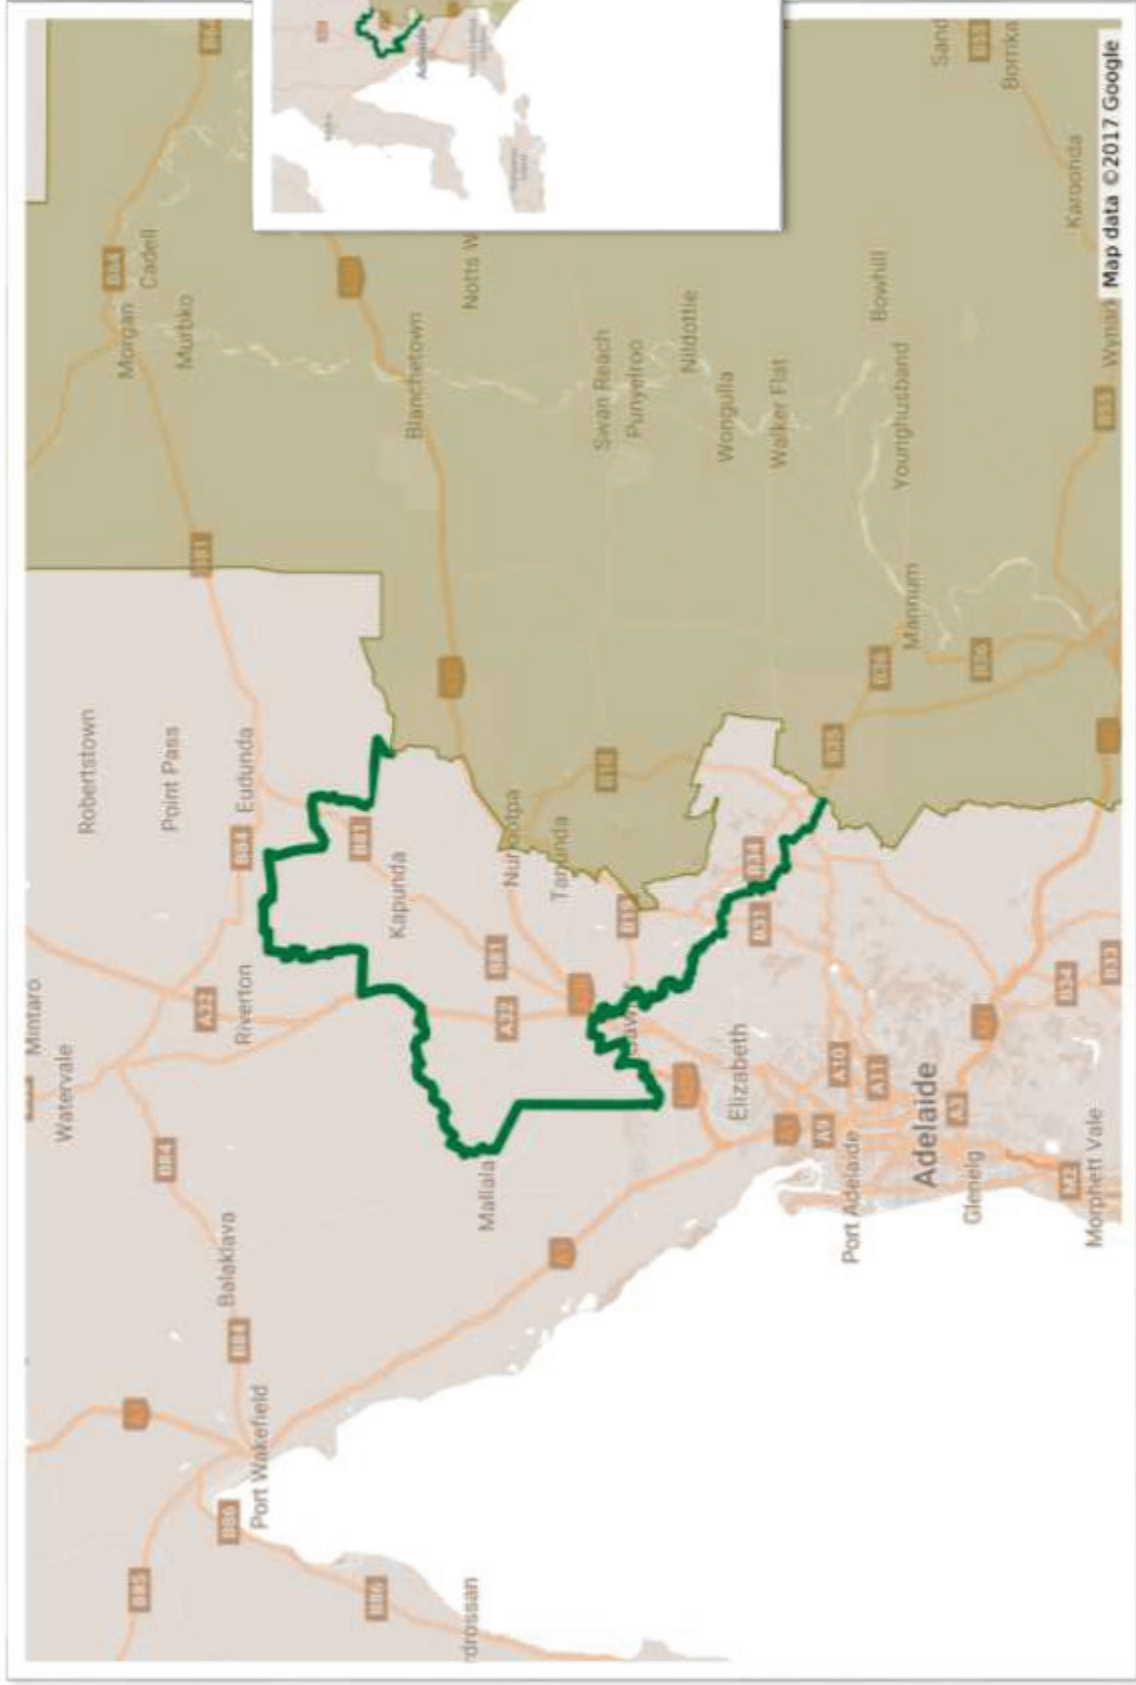

Finally, **Kingston**, having gained from Boothby, can transfer the southern end of the division to **Mayo** to bring the division into tolerance. While the areas between Maslin Beach and Sellicks Beach are more characterised as urban, the need for Mayo to gain electors outweighs the aspiration to keep these areas united in Kingston, and with this area all part of the City of Onkaparinga it is at least somewhat connected to the rest of the division. This is more ideal than making awkward exchanges with Barker in the north or east, or creeping Mayo down the Hills into Adelaide. Ideally, I would have made greater use of the Onkaparinga River here and used the river as the boundary for the entire length, but that would transfer too many electors into Mayo so the boundary at Griffiths Dr and Robertson Rd is used instead.

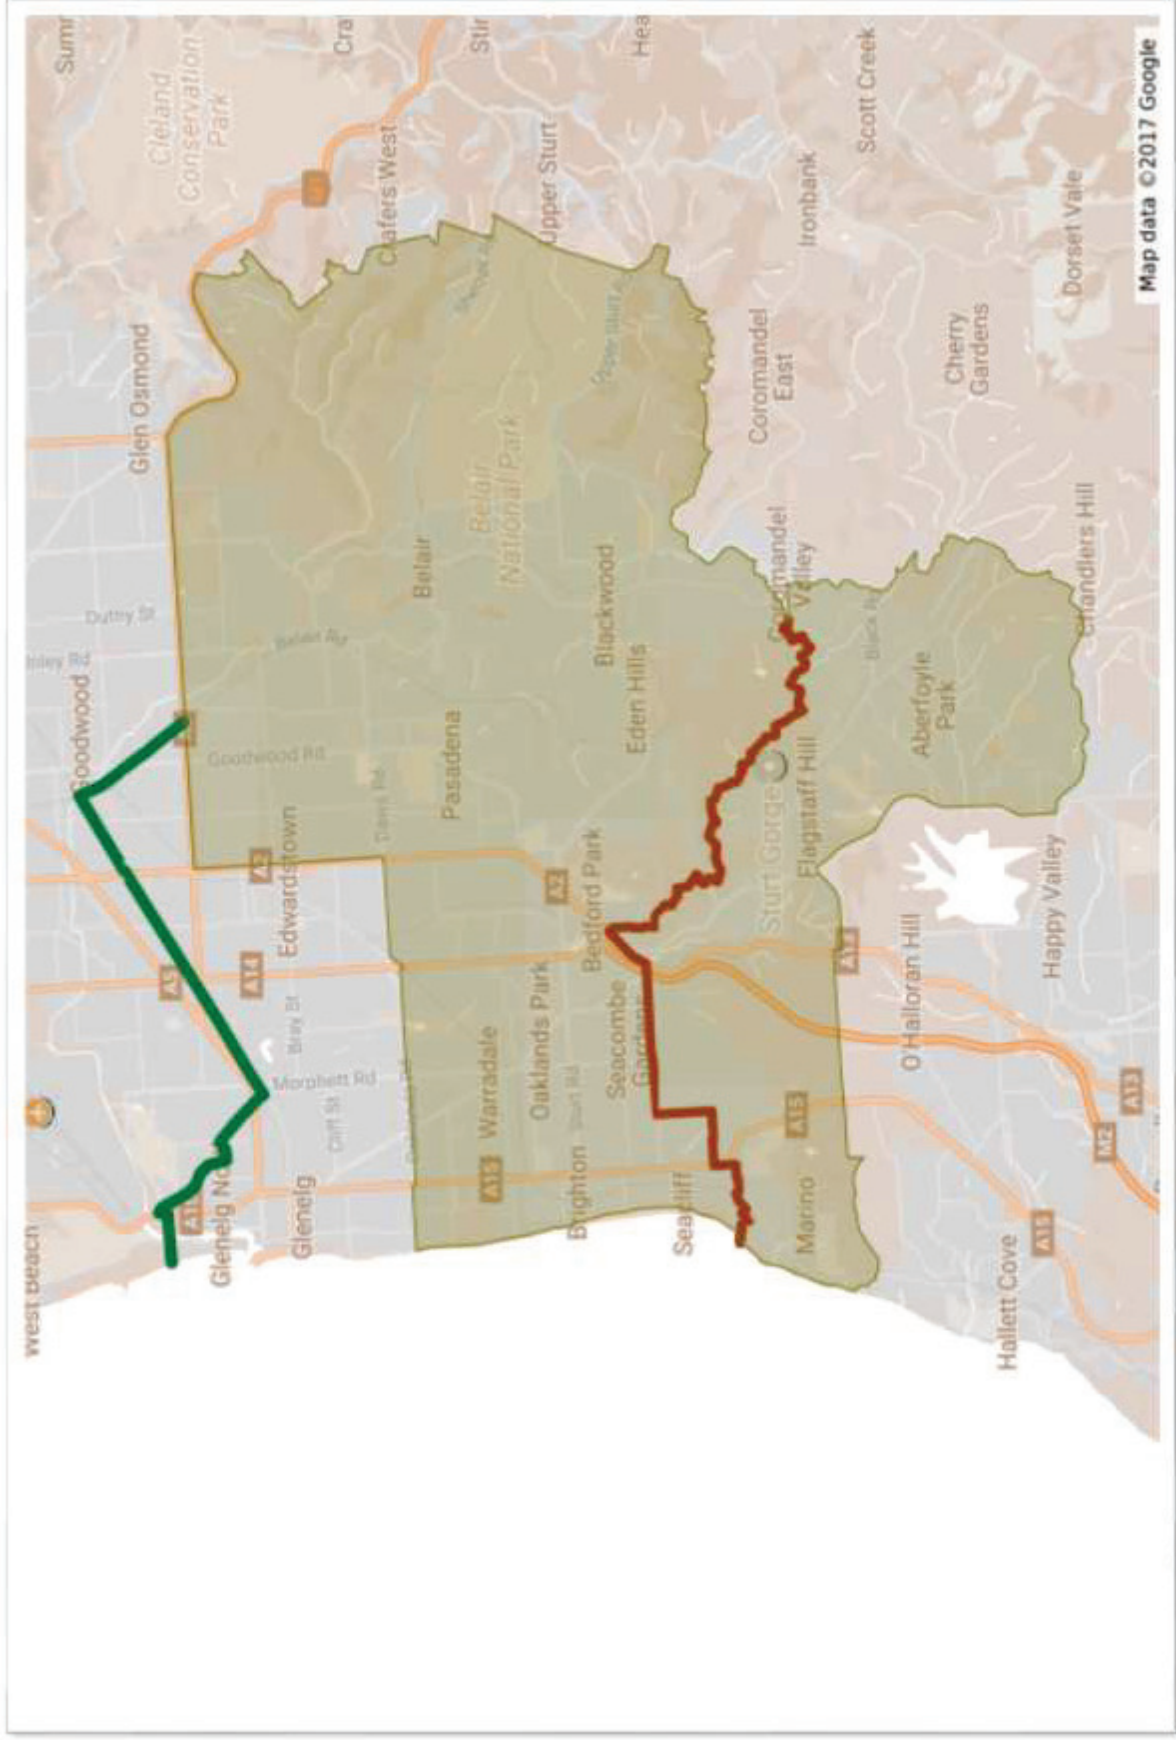

## Data Table

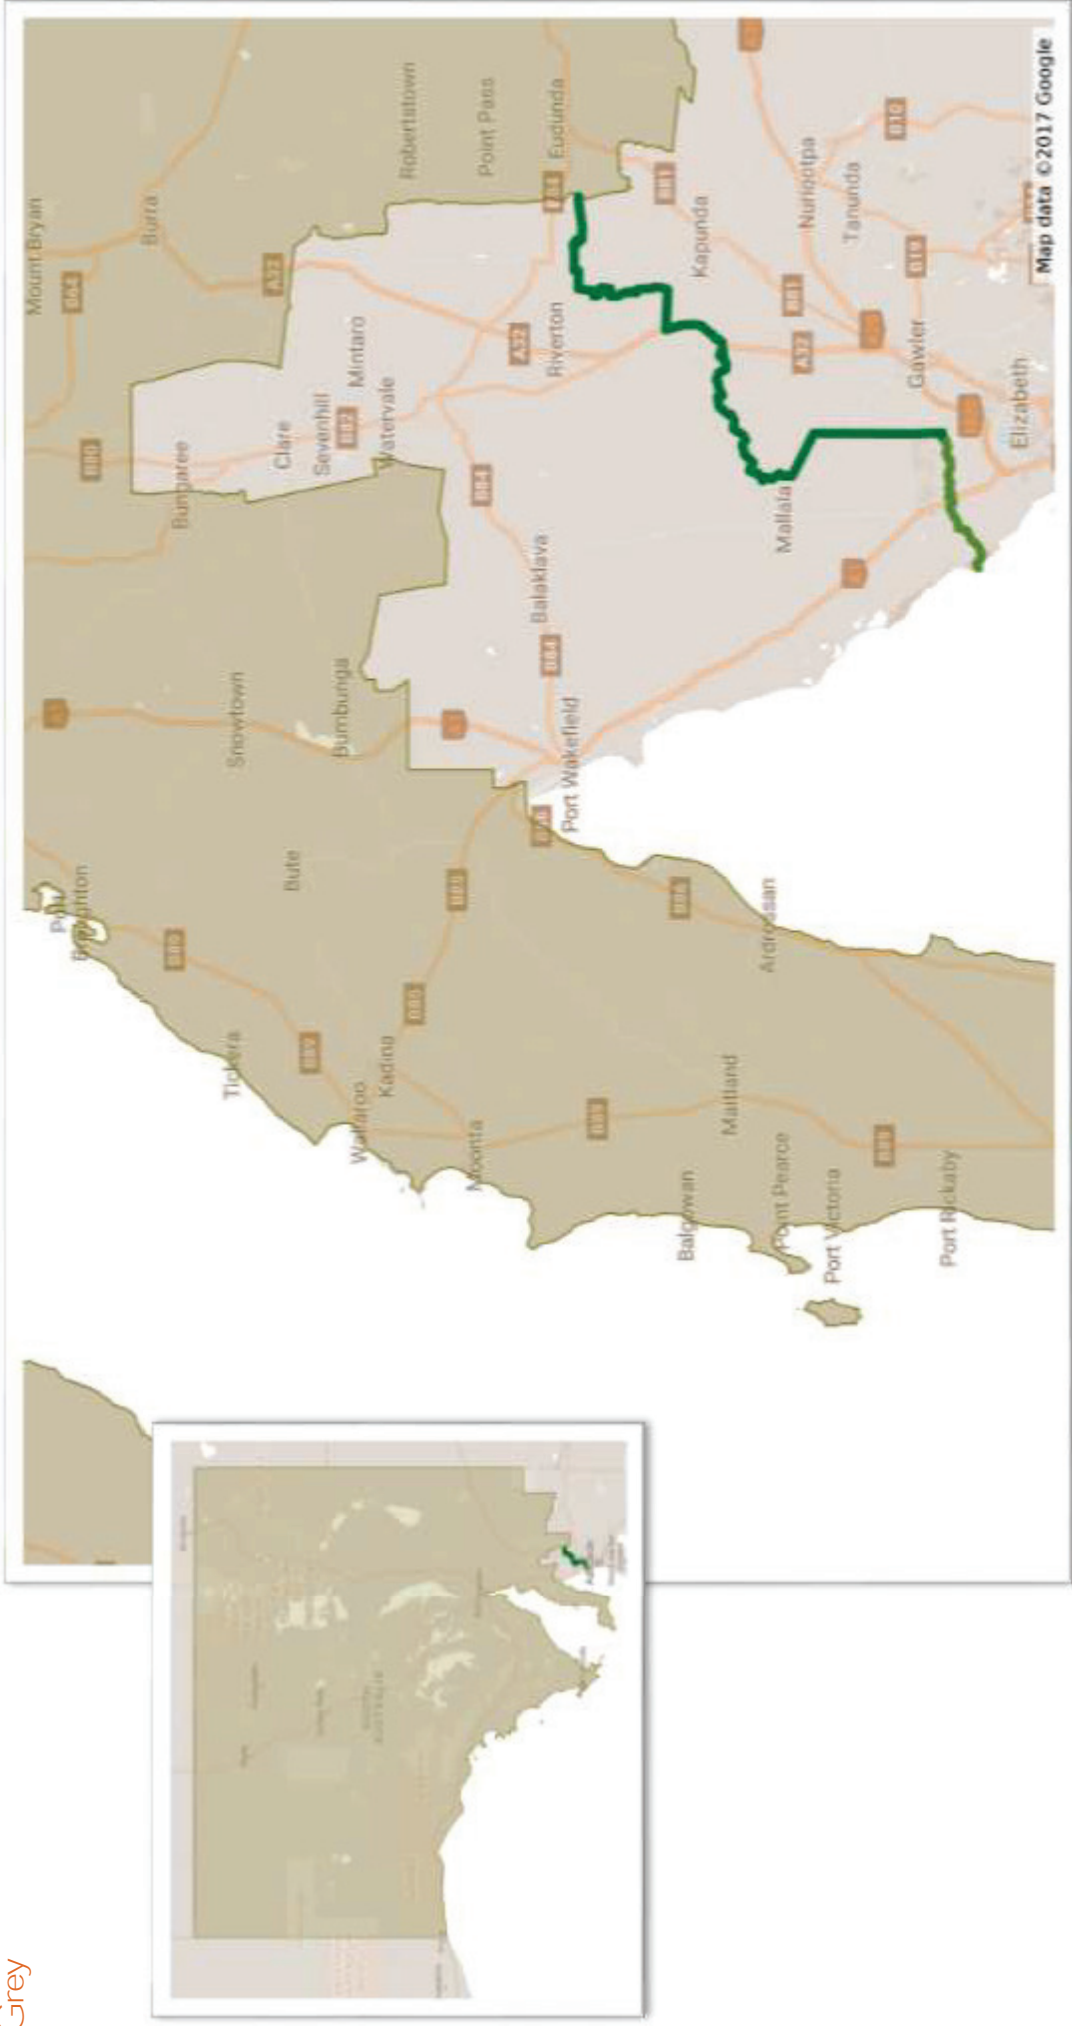

Division Name	Current Actual	Current Projected	Proposed Actual	Proposed Projected
Adelaide	110,351	114,268	119,824	124,419
Barker	106,009	108,383	118,951	122,104
Boothby	107,939	109,835	121,951	124,862
Grey	102,264	102,612	118,126	118,696
Hindmarsh	112,511	114,716	120,705	122,477
Kingston	107,643	110,793	116,703	118,758
Makin	106,191	110,072	120,849	125,679
Mayo	107,636	109,253	119,456	122,140
Port Adelaide	115,227	119,176	-	-
Sturt	104,727	106,669	122,308	124,242
Wakefield	114,533	121,533	116,158	123,933

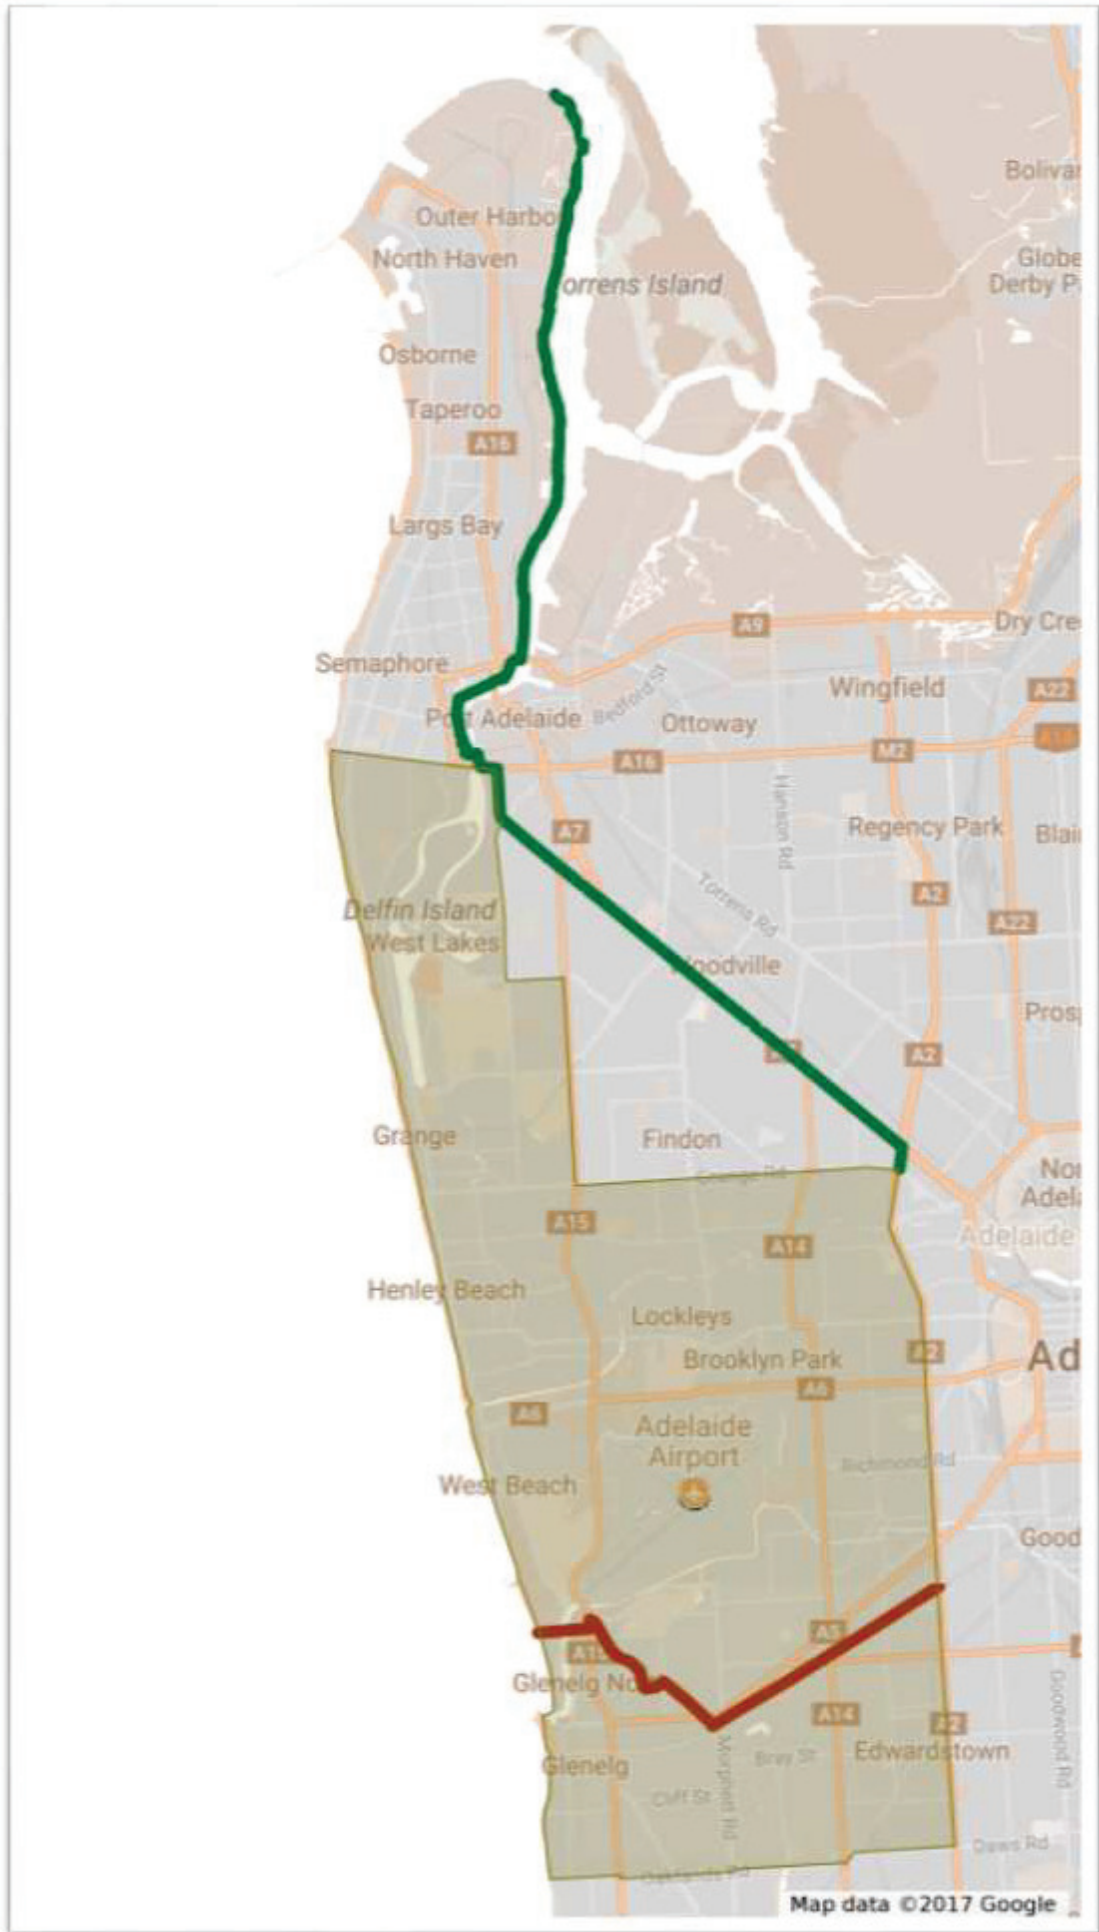

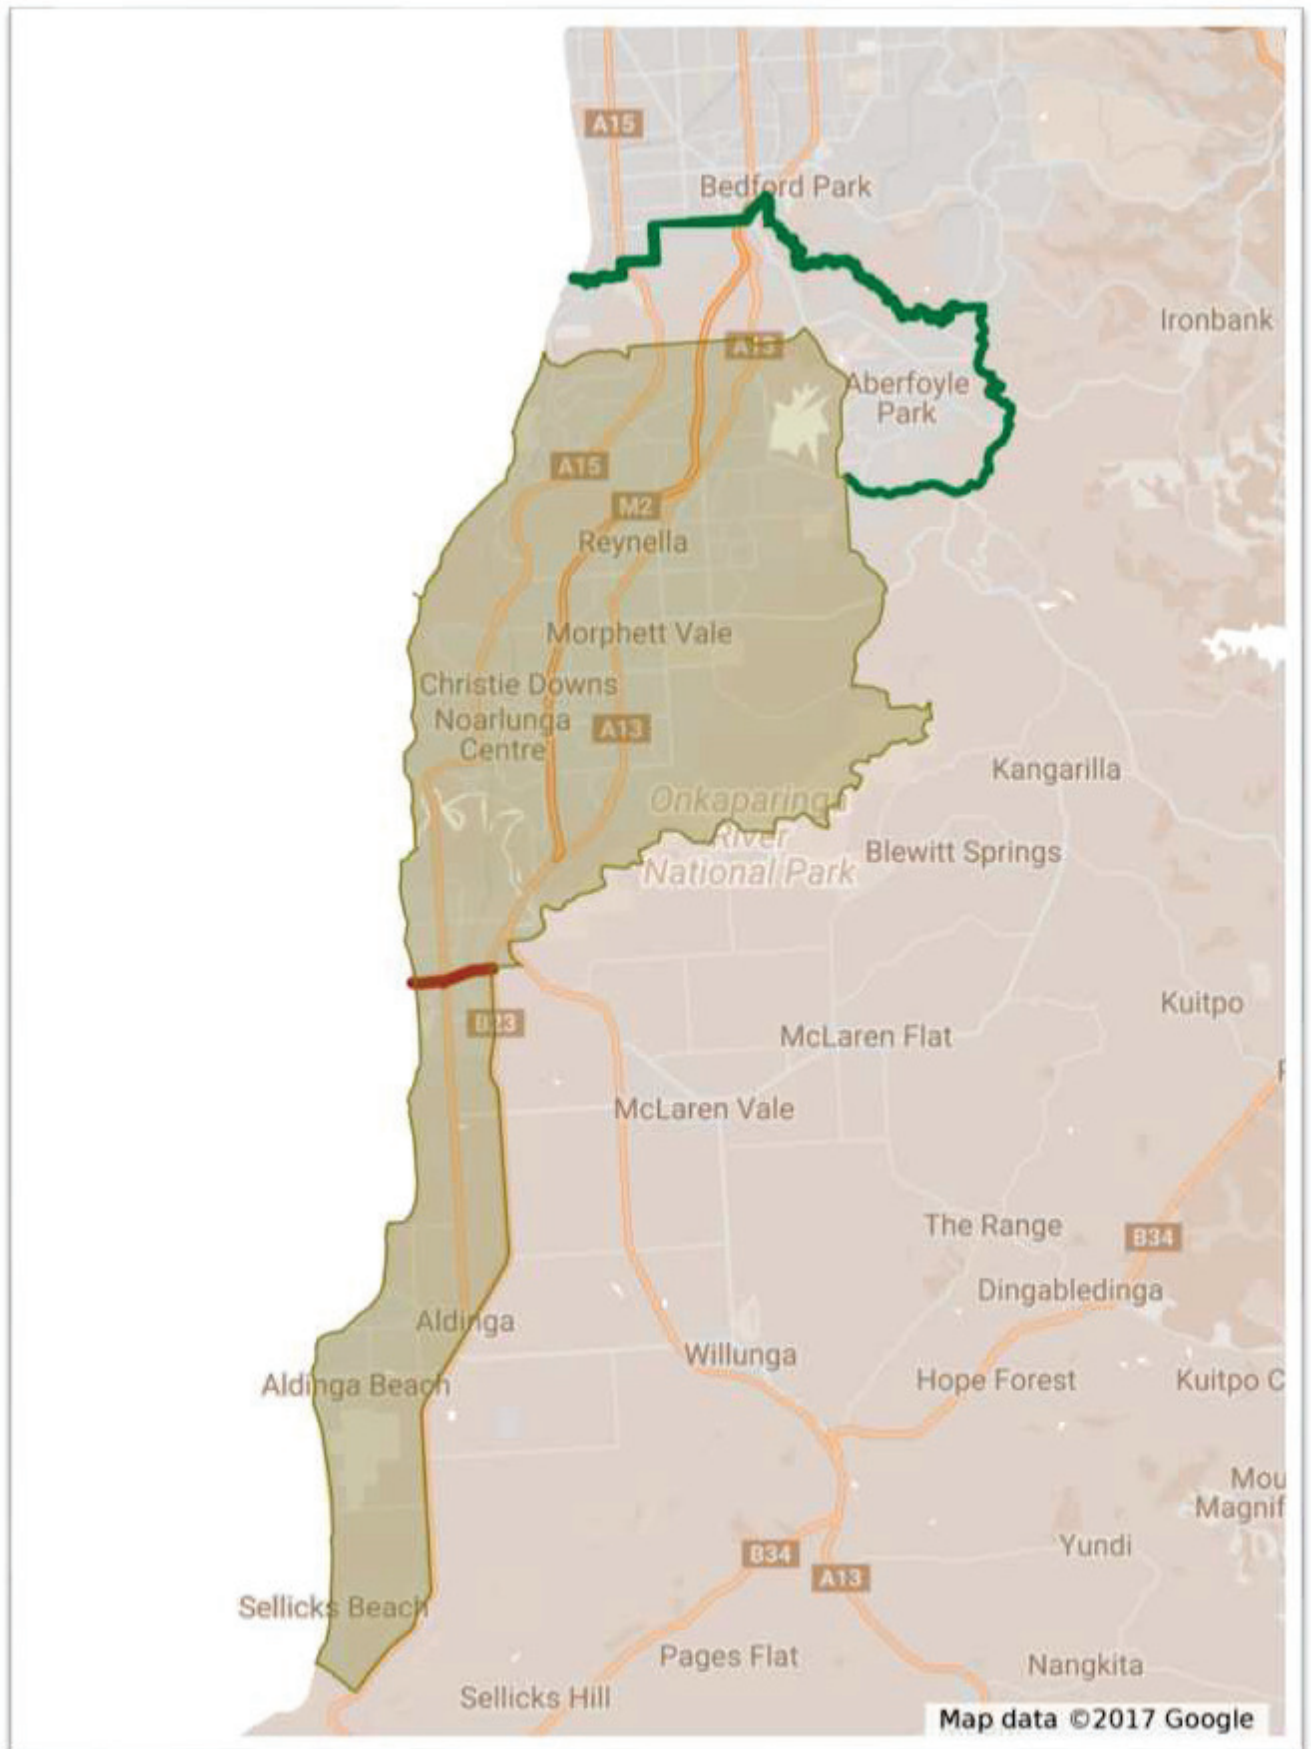

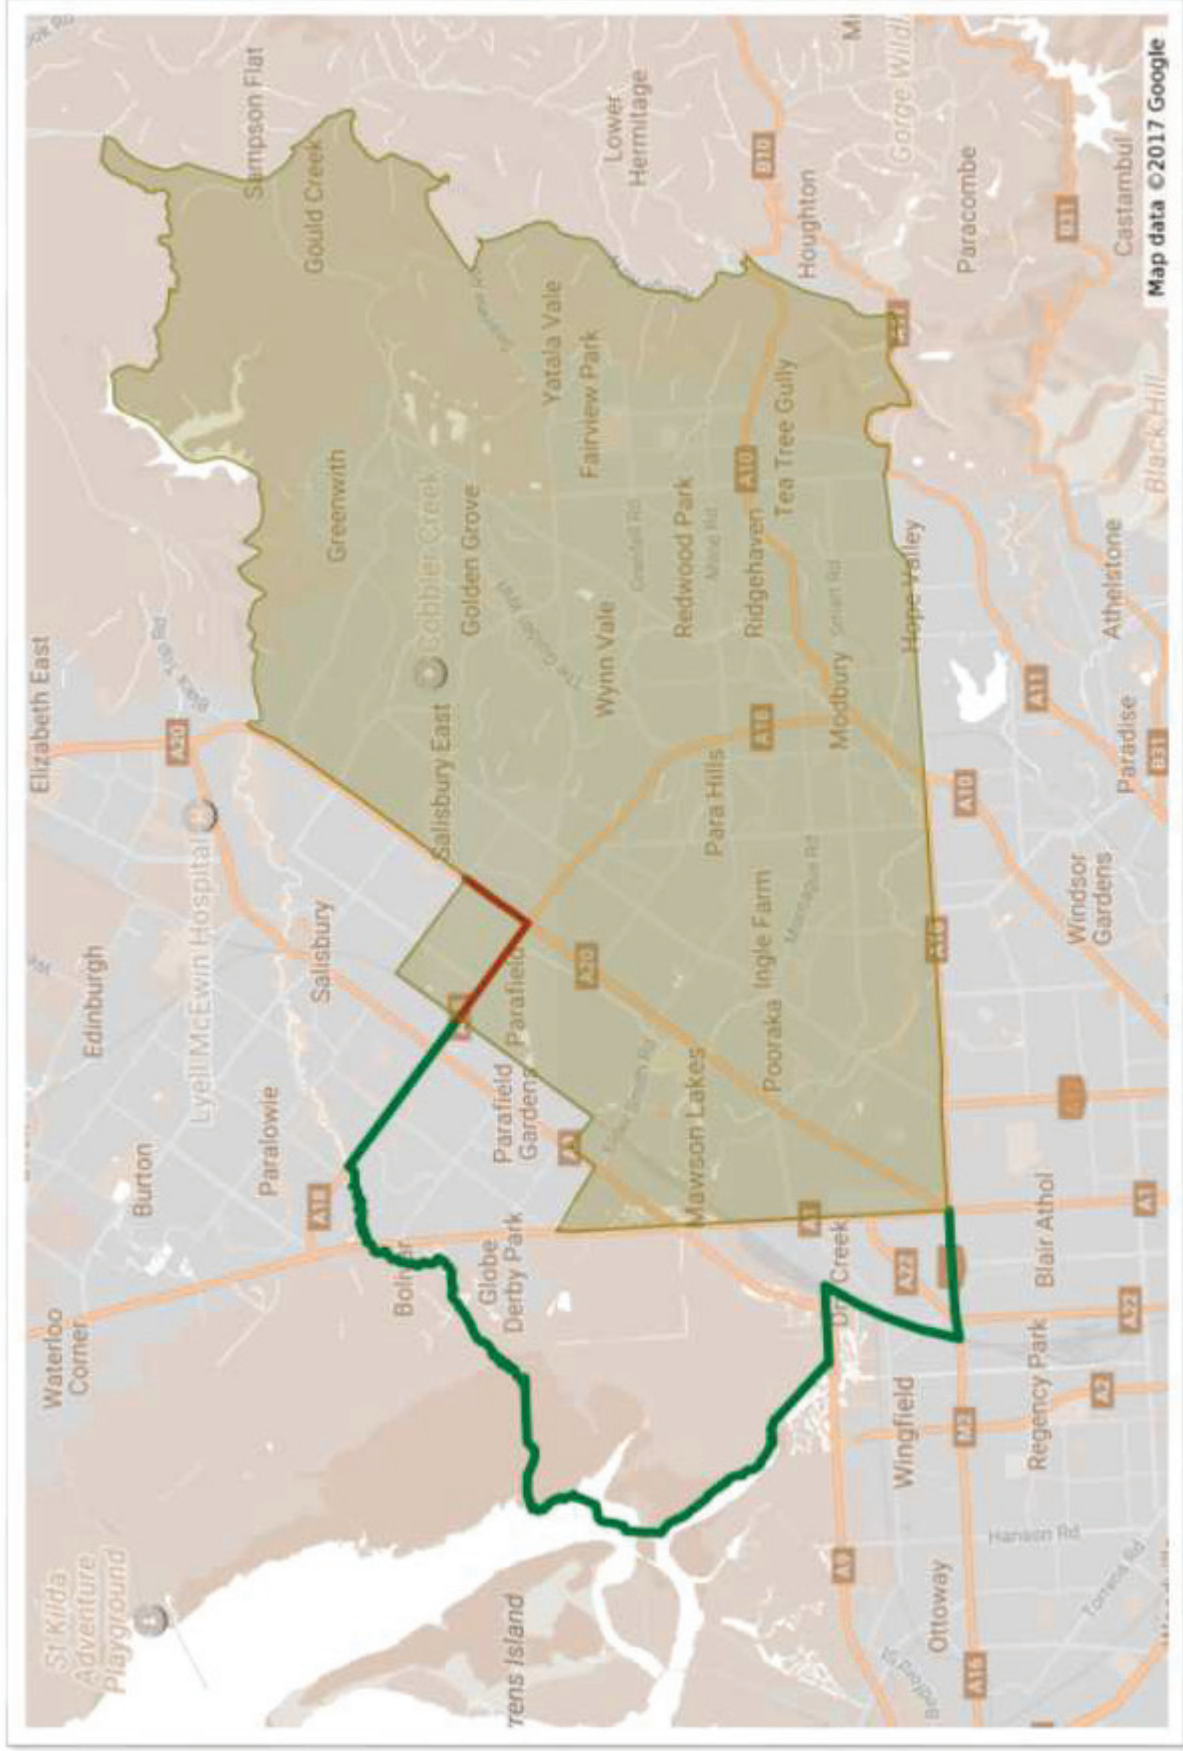

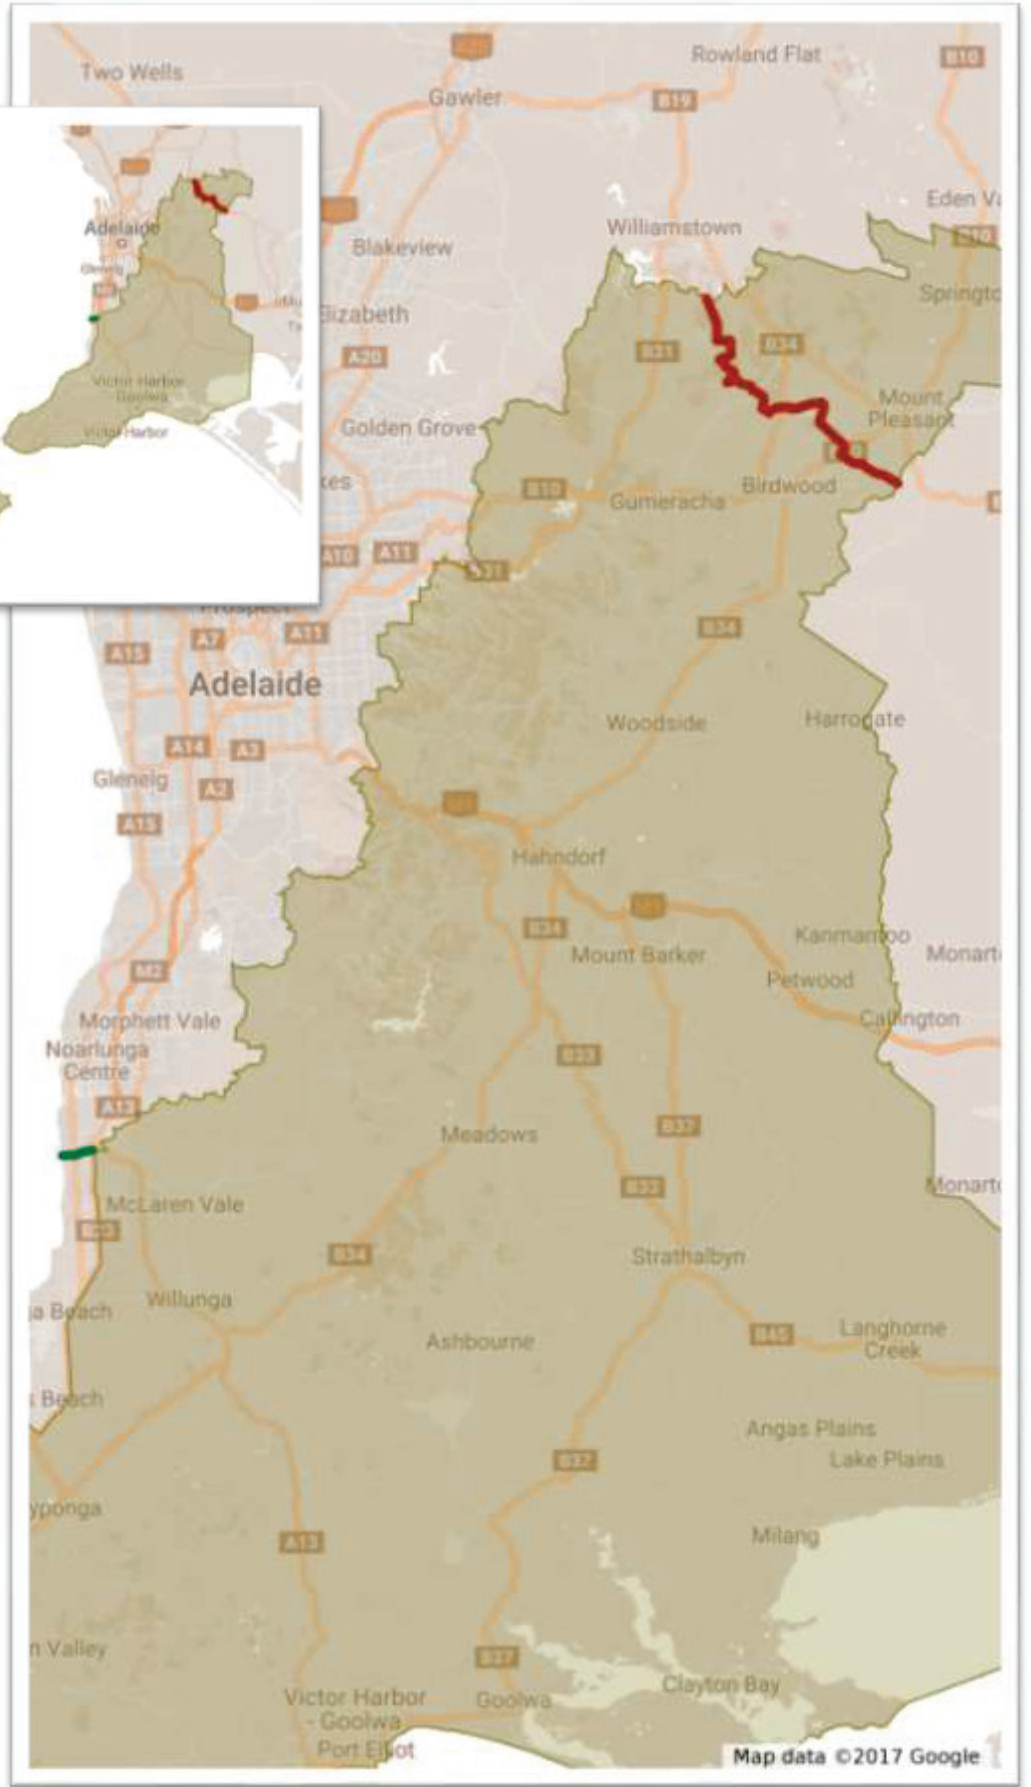

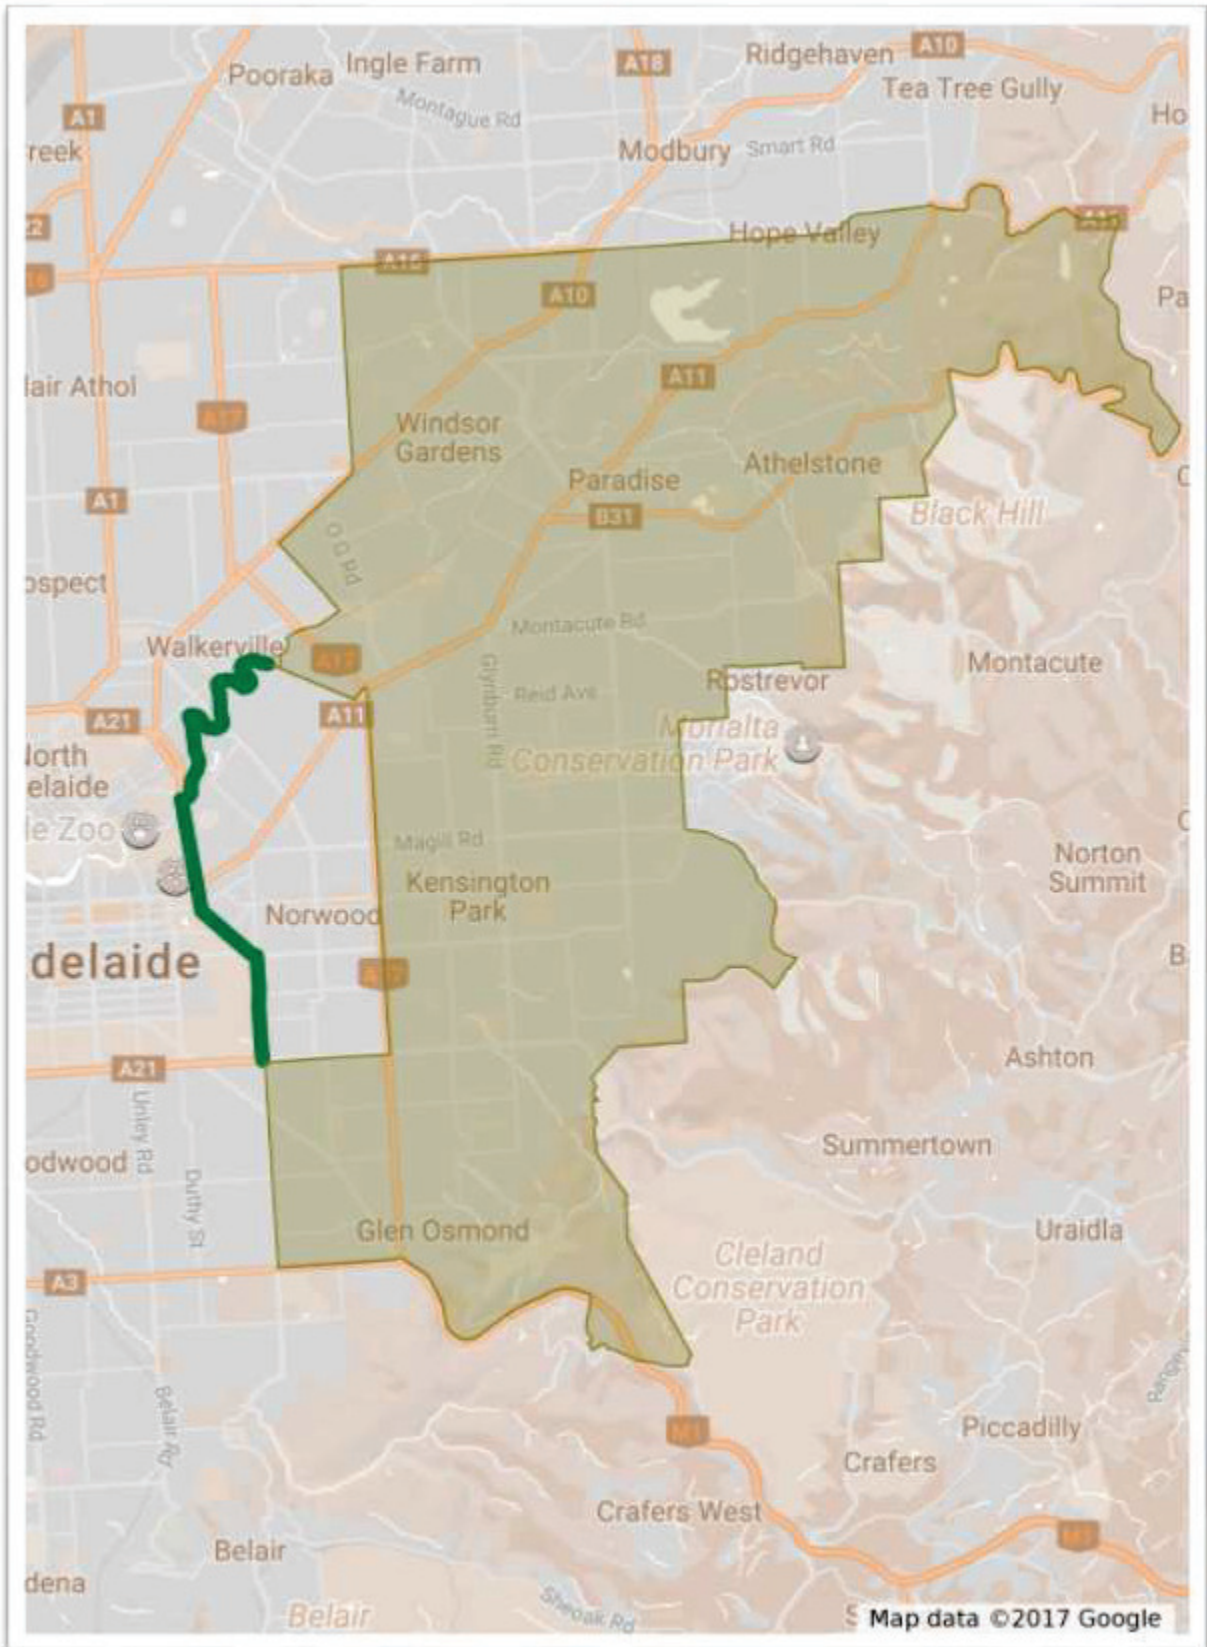

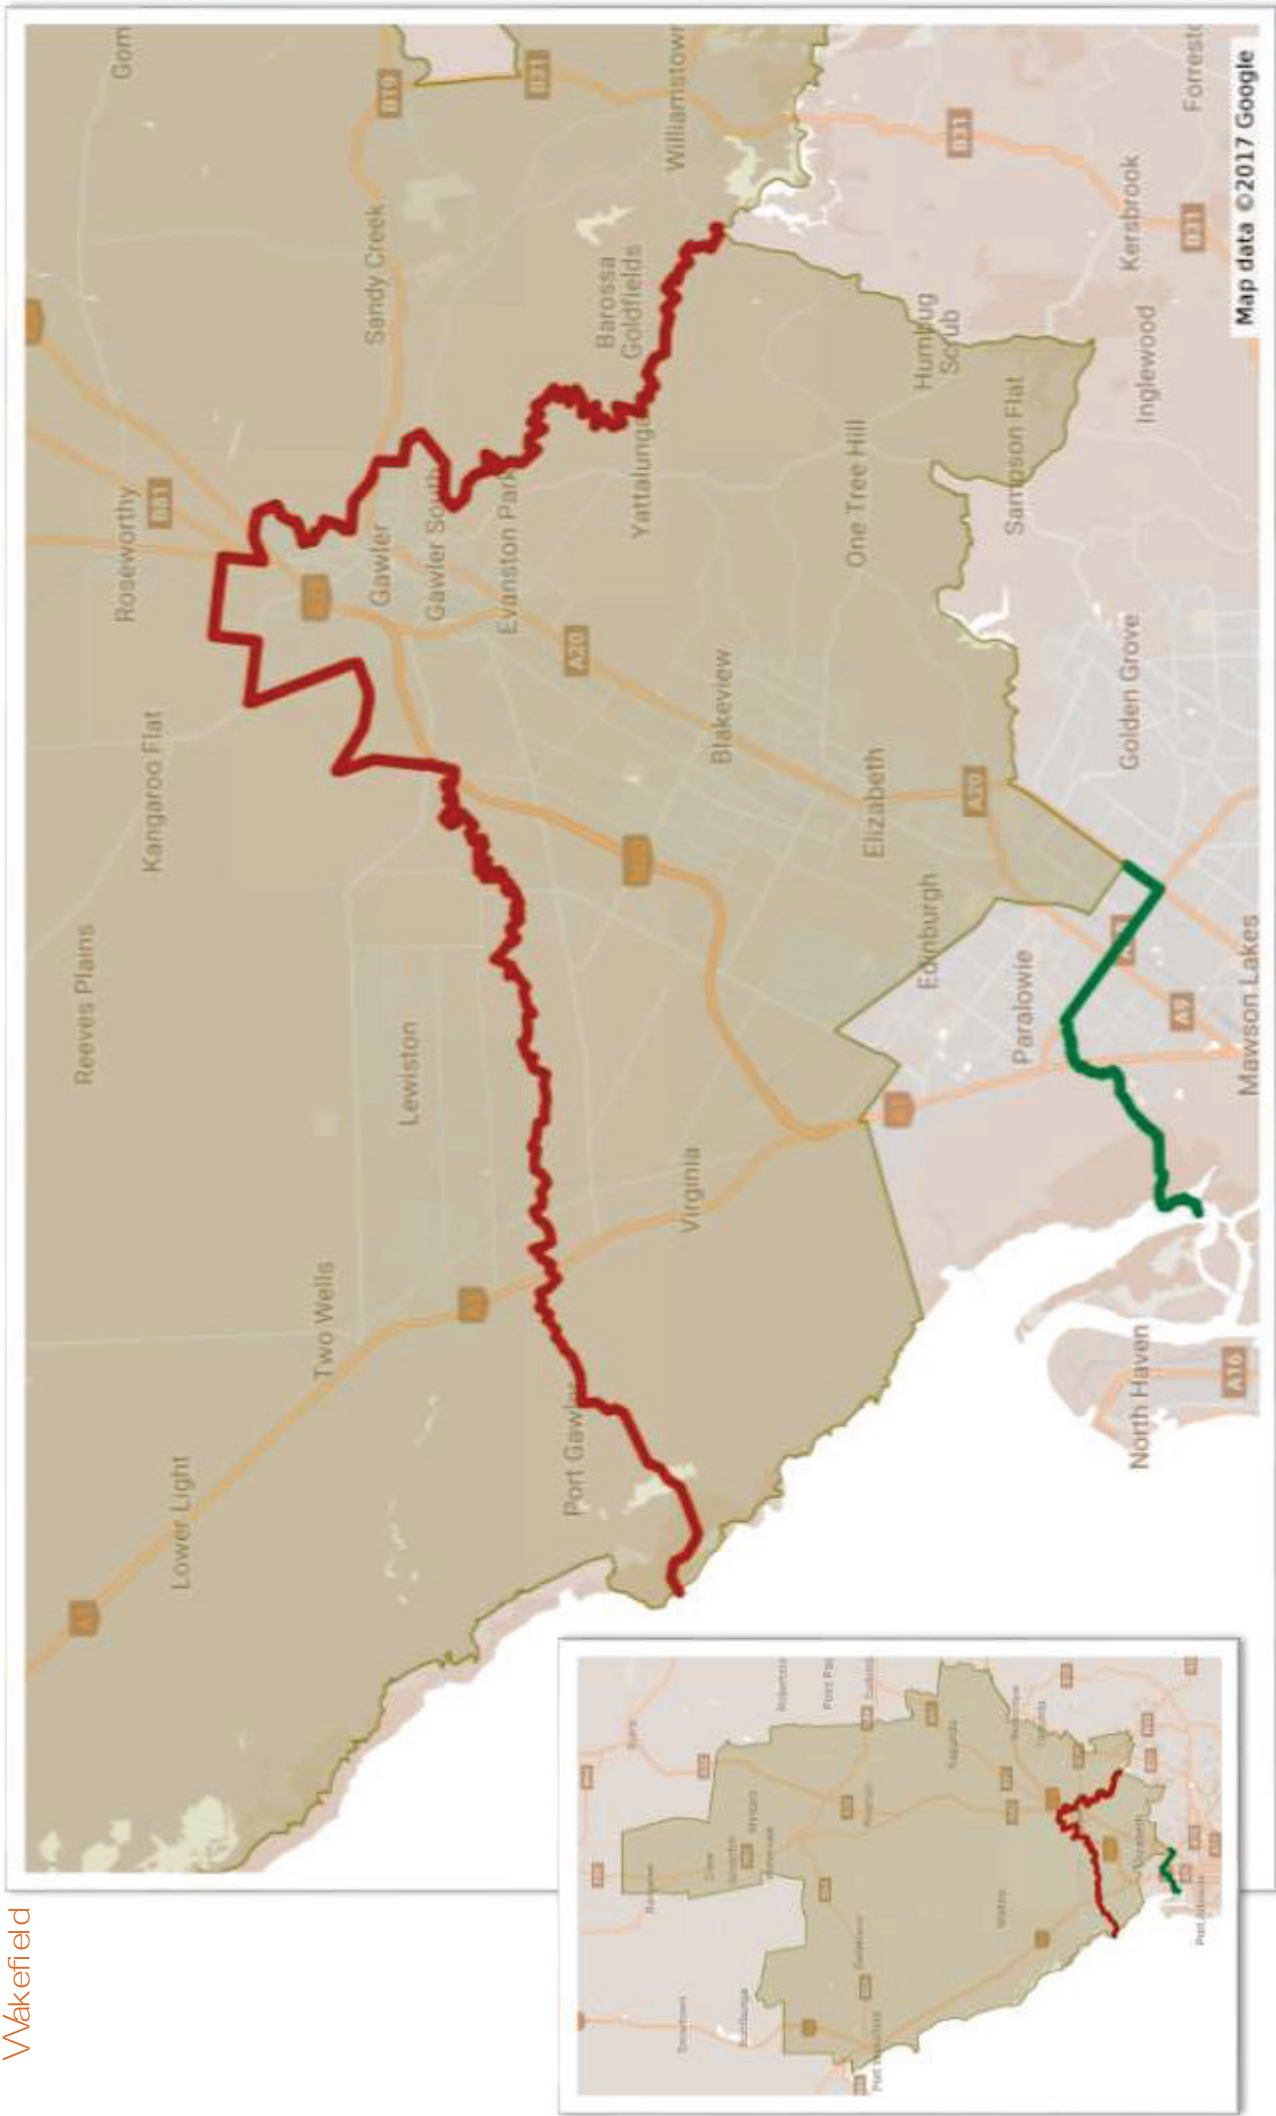

Port Adelaide (abolished)
