AEC proposal summary.odt

1. The purpose of the proposed abolition of North Sydney electorate is to remove independent Kylea Tink in order to halt the migration of votes from the major parties. AEC's proposal aims to split up the large numbers of North Sydney voters, dispersing them into adjacent existing / new / larger electorates.
2. The AEC's stated reasons for proposing the abolition of North Sydney electorate are nonsense and are very thoroughly analysed in the comprehensive submission Objection 686 from Kylea Tink which offers alternative more sensible changes if any changes are actually necessary and I challenge that there is any real need.
3. The proposal amounts to gerrymandering which is illegal and contrary to the legislated and intended purpose of the AEC. It needs to be loudly called out for this. It is an act of political skulduggery and makes a mockery of our system of representative democracy.
4. Kylea has diligently supported the constituents of the electorate and she is our only means of being properly represented in the parliament. I will not permit her to be removed by an unelected anonymous group.
5. Destroying North Sydney electorate is seriously acting against the interests of all Australian citizens.
6. Back off AEC!
